Skylux® - 230 V ACK chain motor

General product description:

The Skylux® electric chain motor is very compact and can be fully integrated in the Skylux® dome thanks to its nice design. The motor comes in white lacquered aluminium (RAL 9006) and is maintenance free. The operation occurs through a switch and opens the actuator up to 400 mm and closes it. The course is set up at 50 mm. This way, you decide during installation or afterwards at what degree the actuator is set.

The electric connection must be done on normal power network. All installation accessories for installation in Skylux® domes come along with the delivery.

Specific characteristics chain motor:

Sizes:	
Length	280mm
Width	48mm
Height	84mm
Tension	230Volt 50Hz AC
Capacity	75W
Traction force	300N
Drive	300N
Operation cycle	14sec
Course	100 - 400mm setting per 50mm

Certification:

CE certificate
